

Appendix 6 Declaration for constituent substances in chemical products

The product's name and area of use:
Producer/importer of the chemical product:

Constituent substances are taken to be any substances in the chemical product, including additives in the ingredients (e.g. preservatives and stabilisers), but not impurities. Substances known to be degradation products from the constituent substances (such as formaldehyde and arylamine) are also considered to be constituent substances.

Impurities are defined as residual products from the production, including the raw material production, that can be found in the final chemical product in concentrations below 100 ppm (0.01% by weight, 100 mg/kg). Impurities in the raw material at concentrations of more than 1% are always regarded as constituent substances.

Examples of impurities are residual reagents, residual monomers, catalysts, bi-products and residual cleaning products from the production equipment and carry-overs from other production lines.

The declaration is made to the best of the signatory's knowledge and according to the knowledge held at the time, based on tests and/or declarations from raw material producers/suppliers. Reservation is made for new developments and knowledge. If such new knowledge should become known, the signatory is obliged to submit an updated declaration to Nordic Ecolabelling.

If the information concerning the composition of the raw materials is confidential, the information can be sent directly to the environmental labelling organisation.

Classification of constituent substances

Are the constituent substances classified in accordance with the table below?

___ Yes ___ No

If yes, state which substances, which classification and the amount:

CLP Regulation 1272/2008		
Hazard class	Code for hazard class and category	Hazard designation
Carcinogenic*	Danger, Carc. 1A or 1B Warning, Carc. 2	H350 H351
Mutagenic*	Danger, Muta. 1A or 1B Warning, Muta. 2	H340 H341
Reprotoxic*	Danger, Repr. 1A or 1B Warning, Repr. 2 -, Lact	H360 H361 H362

* Including all combinations of specified exposure route.

Signature of producer/supplier of the chemical product:

Date:	Company name:
Person responsible:	Responsible persons signature:
