Appendix 6 Declaration from the manufacturer of ethanol

To be used in conjunction with an application for a licence for the Nordic Swan Ecolabelling of care products for vehicles.

This declaration is based on the knowledge we have at the time of the application, based on tests and / or declarations from raw material manufacturers, with reservations for new advances and new knowledge. Should such new knowledge arise, the undersigned is obliged to submit an updated declaration to Nordic Ecolabelling.

Trade name of the ethanol: _____

Is the ethanol produced from renewable raw material? ☐ Yes ☐ No

A renewable raw material is defined as a raw material originating from biological material which is renewed continuously in nature within the immediate future, such as cereals and wood (European standard EN 16575:2014).

If yes, which raw materials?

_____

_____

Is the ethanol produced from sugarcane? ☐ Yes ☐ No

The requirement does not cover by-products, residues, and waste products from the sugar cane industry itself. The requirement also does not cover residues and waste products generated by households or commercial, industrial, or institutional facilities in their role as end-users of a product that can no longer be used for its intended purpose.

If the ethanol is produced from sugarcane:

- Is it certified according to Bonsucro standard (EU REDII approved), version 5.1 or later version? ☐ Yes ☐ No
- Is it certified according to ISCC PLUS v.3 or later version? ☐ Yes ☐ No

Is the ethanol produced from genetically modified organisms (GMOs), for example, genetically modified maize, sugarcane, or sugar beet? ☐ Yes ☐ No

Genetically modified organisms are defined in EU Directive 2001/18. Enzymes and other substances produced by the use of genetically modified microorganisms are not defined as GMOs or material derived from GMOs.
