

Appendix 1 Excluded substances in the coffee machine's components in contact with foodstuffs

To be completed by the manufacturer of the coffee machine and sent to Nordic Ecolabelling.

Coffee machine, model, designation:

or

Spare component, model, designation:

We confirm, to the best of our knowledge, that the following substances are not included* in the components of the coffee machine, or in spare components, in contact with foodstuffs:

- Substances on the Candidate List**
- Substances considered to be potential endocrine disruptors in category 1 or 2 on the EU's priority list of substances that are to be investigated further for endocrine disruptive effects***
- The phthalates di-n-octyl phthalate/DNOP (Cas: 117-84-0) and diisooheptyl phthalate/DIHP (Cas: 41451-28-9)
- Halogenated organic compounds, for example organic chloroparaffins, fluorine compounds and halogenated flame retardants
- Antibacterial substances (including silver ions, nano silver and nano copper)
- Flame retardants that have been given or may be given any of the following hazard statements or combinations:
 - H350 (May cause cancer)
 - H350i (May cause cancer by inhalation)
 - H340 (May cause genetic defects)
 - H360F (May damage fertility)
 - H360D (May damage the unborn child)
 - H360Fd (May damage fertility. Suspected of damaging the unborn child)
 - H360Df (May damage the unborn child. Suspected of damaging fertility)
- Tin, cadmium, chromium VI and mercury or compounds of these

** Ingoing substances are defined as, unless stated otherwise, all substances in the product – including additives (e.g. preservatives or stabilisers) in the raw materials, but not residuals from the production, incl. the production of raw materials. Residuals are defined as residuals, pollutants, contaminants etc. from the production, incl. production of the raw materials, which are present in the final product in amounts less than 100 ppm (0.0100 w/w %, 100 mg/kg), but not substances added to the raw materials or product intentionally and with a purpose – regardless of amount.*

Residuals in the raw materials above 1.0 % are regarded as ingoing substances. Known substances released from ingoing substances are also regarded as ingoing substances.

The declaration concerning ingoing substances is based on the best knowledge at the time of application, with reservations for developments and new scientific findings. If such new knowledge should be made available, the undersigned is required to submit an updated declaration to Nordic Ecolabelling.
