

Appendix 2 Declaration from the manufacturer of the raw material/ingredient

To be used in conjunction with an application for a licence for the Nordic Ecolabelling of chemical building products.

This declaration is based on the knowledge we have at the time of the application, based on tests and/or declarations from raw material manufacturers, with reservations for new advances and new knowledge. Should such new knowledge arise, the undersigned is obliged to submit an updated declaration to Nordic Ecolabelling.

Raw material/Ingredient name: _____

Raw material's/ingredient's function: _____

The term constituent substance refers to all substances in the product, including additives in the ingredients (such as preservatives and stabilisers) but does not include impurities from primary production. Impurity refers to residues from primary production which may be found in the finished product at concentrations below 100 ppm (0.0100% by weight, 100 mg/kg), but not substances that have been added to a raw material or the product actively and for a particular purpose, irrespective of quantity.

Impurities of over 1.0% concentration in the primary product are, however, regarded as constituent substances. Substances known to be degradation products of the constituent substances are also themselves considered to be constituent substances.

O3: Does the product contain substances classified with any of the hazard phrases below?		
	Yes	No
H350 – Carcinogenic, hazard category 1A and 1B H350i – May cause cancer by inhalation H351 – Carcinogenic, hazard category 2	<input type="checkbox"/>	<input type="checkbox"/>
H340 – May cause genetic defects, hazard category 1A and 1B H341 – May cause genetic defects, hazard category 2	<input type="checkbox"/>	<input type="checkbox"/>
H360 – Toxic for reproduction, hazard category 1A and 1B H361 – Toxic for reproduction, hazard category 2 H362 – Toxic for reproduction – effects on or through breastfeeding (supplementary category)	<input type="checkbox"/>	<input type="checkbox"/>
H334 – Airway sensitising category 1/1A/B	<input type="checkbox"/>	<input type="checkbox"/>
STOT SE 1 H370 STOT RE 1 H372	<input type="checkbox"/>	<input type="checkbox"/>

If yes, specify which substance, CAS no., function, classification, and concentration in ppm:

Yes **No**

O4: Does the raw material contain any substances classified as harmful to the environment with the following risk phrases or combinations of them?

☐ ☐

H410– Aquatic Chronic 1
H411– Aquatic Chronic 2
H412– Aquatic Chronic 3

If yes, state which substance, CAS no., function, classification, and concentration in ppm:

Yes **No**

O5: Does the raw material contain any preservatives?

☐ ☐

If yes, state log Kow/BCF or E-number for each preservative:

State, for each preservative: CAS no. and concentration in ppm:

Yes **No**

Is/are the preservative(s) approved in The Biocidal Product Regulation (Regulation (EU) 528/2012)?

☐ ☐

Yes **No**

O6: Does the raw material contain formaldehyde or formaldehyde releasing substances?

☐ ☐

If yes, specify in which raw materials(s), and the concentration of free formaldehyde in ppm in the final product:

Yes **No**

Is formaldehyde or formaldehyde releasing substances actively added to the raw material?

☐ ☐

O7: Does the raw material contain residual monomers that are classified with any of the following hazards ?

☐ ☐

Classification according to CLP Regulation 1272/2008	
Hazard class and category	H-phrase
Carcinogenic Category Carc 1A/1B/2	H350, H351
Mutagenic Category Mut 1A/B/2	H340, H341
Toxic for reproduction Repr 1A/1B/2	H360, H361, H362
Specific target organ toxicity with single exposure STOT SE 1-2	H370, H371
Specific target organ toxicity with repeated exposure STOT RE 1-2	H372, H373
Respiratory sensitisation	H334

If yes, state which substance(s), classification, and concentration in ppm:

Yes No

O8: Does the raw material contain any heavy metals (cadmium, lead, chromium^{VI}, mercury, arsenic, barium, selenium, antimony)?

☐ ☐

Barium sulphate and other insoluble barium compounds are exempted

An exemption is also made for antimony contained in a TiO₂ rutile lattice, on the following terms: test results must prove that the molecular structure is inert and that the environmental and health effects of the pigment are on the same level as, or better than, the results for C.I Pigment Brown 24 CAS no. 68186-90-3 and C.I Pigment Yellow 53 CAS no. 8007-18-9 in the report: UNEF Publications, OECD SIDS Initial Assessment Profile (www.inchem.org).

If yes, specify in the table below which heavy metal(s), concentration in ppm for each one, and whether the heavy metal is actively added or an impurity.

Heavy metal	Concentration ppm	Actively added/impurity?
Cadmium		
Lead		
Chromium 6		
Mercury		
Arsenic		
Barium		
Selenium		
Antimony		

Yes No

O9: Does the raw material contain titanium dioxide?

☐ ☐

If yes, state the weight-% titanium dioxide:

If more than 3 weight-%, state the manufacturer of the titanium dioxide:

Yes No

O11: Does the raw material contain any nanomaterials according to the EU definition, 2011/696/EU, (including nanotitanium dioxide)

☐ ☐

Definition: A nanomaterial is a natural, incidental, or purposely manufactured material containing particles, in an unbound state or as an aggregate or as an agglomerate and where, for at least 50% of the particles in the number size distribution, one or more external dimensions is in the size range 1-100 nm.

If yes, what kind of nanomaterial is it?

Does it qualify for the exemption in requirement O11? **Yes** **No**

☐ ☐

If yes, please explain why:

If the product contains synthetic amorphous silica, please inform about the surface-treatment of the nano particles.

And state whether the surface-treated nano particles fulfil the requirements O3 and O12.

O12: Does the raw material contains any of the following substances?	Yes	No
<ul style="list-style-type: none"> • Substances on the candidate list (The Candidate List can be found on the ECHA website at: http://echa.europa.eu/candidate-list-table) 	<input type="checkbox"/>	<input type="checkbox"/>
<ul style="list-style-type: none"> • Substances evaluated by EU as PBT (Persistent, bioaccumulable and toxic) or vPvB (very persistent and very bioaccumulable), in accordance with the criteria in appendix XIII in REACH. 	<input type="checkbox"/>	<input type="checkbox"/>
<ul style="list-style-type: none"> • Substances considered to be potential endocrine disruptors in category 1 or 2 on the EU's priority list of substances that are to be investigated further for endocrine disruptive effects. The list can be read in its entirety at http://ec.europa.eu/environment/archives/docum/pdf/bkh_an nex_10.pdf, see appendix L 	<input type="checkbox"/>	<input type="checkbox"/>
<ul style="list-style-type: none"> • Tin-organic compounds 	<input type="checkbox"/>	<input type="checkbox"/>
<ul style="list-style-type: none"> • Phthalates 	<input type="checkbox"/>	<input type="checkbox"/>
<ul style="list-style-type: none"> • APEO – alkylphenol ethoxylates and alkylphenol derivatives (substances that release alkylphenols on degradation). 	<input type="checkbox"/>	<input type="checkbox"/>
<ul style="list-style-type: none"> • Halogenated organic substances. Exemptions: <ul style="list-style-type: none"> ○ preservatives that fulfil O5 and paint pigments that meet the EU's requirements concerning colourants in food packaging under Resolution AP (89) point 2.5, ○ polymers containing polymerized vinyl chloride in adhesives and sealants, in concentrations under 2.0 % in the final product (requirement O7 regarding rest monomers needs to be fulfilled) and ○ dries in oxidative drying paints (note: see O3) 	<input type="checkbox"/>	<input type="checkbox"/>
<ul style="list-style-type: none"> • Isocyanates (water-based polyisocyanates with a chain length of more than 10 are exempted, where the concentration of isocyanates with a chain length of less than 10 as an impurity is documented). 	<input type="checkbox"/>	<input type="checkbox"/>
<ul style="list-style-type: none"> • Fragrances 	<input type="checkbox"/>	<input type="checkbox"/>

If yes, state the CAS no. (if possible), chemical name and concentration (in ppm, weight-% or mg/kg). Also state whether the substance is present as an impurity or an added substance.

O13, O16, O19, O22, O24, O29 Does the raw material contain:**Yes No**

Volatile organic compounds (VOC)

☐ ☐

If yes, state the CAS no. (if possible), chemical name, concentration (in ppm, weight-% or mg/kg) and the boiling point. Also state if the substance is present as an impurity or an added substance.

O13, O16, O19, O22, O24, O29 Does the raw material contain:**Yes No**

Volatile aromatic hydrocarbons (VAH)

☐ ☐

If yes, state the CAS no. (if possible), chemical name, concentration (in ppm, weight-% or mg/kg) and the boiling point. Also state if the substance is present as an impurity or an added substance.

In the event of any change to the composition of the product, a new declaration of fulfilment of the requirements is to be submitted to Nordic Ecolabelling.
