

## Appendix 14 Filling- and stuffing materials

Completed by the manufacturer/supplier of filling- or stuffing materials

Manufacturer/supplier of filling- or stuffing materials:
Tradename of the filling or stuffing material:

### Framework of the declaration

**Ingoing substances:** All substances regardless of concentration in a used chemical (eg pigment or bleach) or chemical mixture (eg glue or surface treatment), including additives (such as preservatives and stabilisers) from the raw materials. Substances known to be released from ingoing substances (such as formaldehyde, arylamine and in-situ generated preservatives) are also regarded as ingoing substances.

**Impurities:** Residuals, pollutants, contaminants et from production, including raw materials production, that remain in a chemical or in the chemical product in concentrations  $\leq 100.0$  ppm ( $\leq 0.01000$  wt%,  $\leq 100.0$  mg/kg).

Impurities in the raw materials exceeding concentrations of 1.0% are always regarded as ingoing substance, regardless of the concentration in the chemical product. Examples of contaminants are residues of the following: reagents including monomers, catalysts, byproducts, "scavengers" (i.e. chemicals used to eliminate/minimise adverse substances), cleaning agents for production equipment, and "carry-over" from other/earlier production lines.

This declaration is based on the knowledge we have at the time of the application, based on tests and/or declarations from raw material manufacturers, with reservations for new advances and new knowledge. Should such new knowledge arise, the undersigned is obliged to submit an updated declaration to Nordic Swan Ecolabelling.

If some of the information in this declaration is confidential, the information may be sent directly to the Nordic Swan Ecolabelling.

Requirement O44: Wool, down, feathers and vegetable fibre and seeds	Yes	No
Are filling and stuffing materials of wool, down, feathers or vegetable fibers and seeds without chemical additives and chemical treatments? If yes, these are excepted from requirement O45 and O47.		
Requirement O45: Emission requirements of filling and stuffing materials	Yes	No
Do the following substances and substance groups have higher emissions of the levels stated below? <b>Documentation:</b> Attach test report showing the emission from the stated substances and substance groups. Emission tests must be performed according to the ISO 16000 standard, parts 3, 6, 9, & 11 Alternatively, a licence for EU Ecolabel for mattresses, or a certificate for either Oeko-Tex class I baby or CertiPUR, can be used as documentation.		
Emission of volatile organic compounds mg/m <sup>3</sup>		
Substance or substance group	Requirement limit	
Formaldehyde (50-00-0)	0,1	
Toluene (108-88-3)	0,1	
Styrene (100-42-5)	0,005	
Vinylcyclohexene (100-40-3)	0,002	
4-Phenylcyclohexene (4994-16-5)	0,03	
Vinylchloride (75-01-4)	0,002	
Aromatic hydrocarbons	0,3	
Volatile organic compounds	0,5	

<b>Requirement O46: Halogenated flame retardants</b>	<b>Yes</b>	<b>No</b>
Are halogenated flame retardants used in the filling or stuffing materials?		

In case of changes in the composition of products, a new Appendix with fulfillment of requirements must be submitted to Nordic Swan Ecolabelling.
